Skills

Software: Microsoft Power Platform, Power BI, UiPath, Jira, Azure DevOps, Dataverse

Technical: SQL, C#, REST APIs, Low-Code Solution Design, Business Process Automation, Workflow Automation, Canvas & Model-Driven App Development

Experience

Automation Engineer II, Stock Yards Bank – Louisville, KY 2025-present

- Designed and delivered 10 Power Platform automations supporting internal banking operations, handling 50–300 transactions per workflow per month.
- Built Power Automate workflows supporting loan boarding and internal request handling, improving processing accuracy and reducing turnaround time by 40%.
- Developed an internal official check request solution integrating Power Automate, SharePoint, and Jira; eliminated manual reconciliation, achieved near-100% request traceability, and reduced audit follow-ups by 45%
- Implemented teller outage tracking using SharePoint Lists to improve operational visibility and response coordination.
- Extended automation capabilities using UiPath for legacy systems not supported by native Power Platform connectors.

Senior Software Engineer, Priceweber – Louisville, KY 2024 – 2025

- Built Power Platform internal tools automating email intake and Jira issue creation, reducing manual triage effort by 60% and improving response times by 30%.
- Designed Power BI dashboards tracking departmental hours, utilization, and KPIs, providing leadership with near real-time visibility into workload distribution and delivery trends.
- Established Azure DevOps CI/CD pipelines, reducing manual deployment effort by 70% and improving release consistency and rollback reliability.
- Delivered a digital onboarding workflow using C#, .NET, and SQL, replacing paper-based processes and reducing onboarding cycle time from days to hours.

Senior Software Engineer, Lifelogics – Nottingham, MD (remote) 2023 – 2024

- Implemented and optimized critical modules in TrueNorth, supporting 40% of U.S. organ donation workflows and ensuring mission-critical reliability for time-sensitive healthcare operations.
- Designed and implemented secure REST API integrations enabling electronic donor referral and suitability data exchange.
- Built internal dashboards and reporting tools to improve development workflow visibility and peer review efficiency.

Developer II, Atria Senior Living – Louisville, KY 2019 – 2022

- Built and enhanced .NET applications supporting senior living operations, clinical workflows, and regulatory compliance across 230 facilities.
- Automated state-mandated assessments, reducing completion time to under five minutes and cutting manual entry by 90%.
- Designed configurable assessment workflows with conditional logic, automated sub-assessments, and secure eSignatures, reducing form errors and rework.
- Delivered offline-capable applications with synchronization, alerts, and reporting to support medication administration tracking in low-connectivity environments.

Education

University of Louisville – MS in Computer Science 2023

University of Louisville – BA in Studio Art 2015
